

ASK FOR A NEIGHBORHOOD ENVIRONMENTAL REPORT WITH YOUR HOME INSPECTION ...

...AND GET PEACE OF MIND.

Even the most “pristine” or “upscale” areas can have environmental issues affecting health and home values. An [EDR Neighborhood Environmental Report™](#) helps ensure that there are no surprises. This report searches for records of contamination from common occurrences such as:

- > Leaking underground fuel or gas tanks that can contaminate soil and groundwater
- > Homes formerly used as “Meth” labs, where residual chemicals can cause illness
- > Contamination from nearby industrial sites, farms or accidental toxic spills
- > EPA's top clean-up priority properties

Many residential properties and neighborhoods are clean. To be sure that yours is - and ensure your property's future value - order the [EDR Neighborhood Environmental Report](#) with your home inspection.

Trust the Experts

Environmental Data Resources, Inc. (EDR) provides the most comprehensive residential environmental report available. EDR has been a national leader in the U.S. environmental information market since 1990 and is a recognized authority and innovator in providing environmental information for real estate transactions.

EDR is wholly owned by DMG Information, the business information division of Daily Mail and General Trust, plc (DGMT).

To learn more about EDR's Neighborhood Environmental Reports, contact us at [1-800-624-0470](tel:1-800-624-0470) or visit us at www.edrnet.com/residential.
